

2nd Annual Electricity Camp in the Rockies

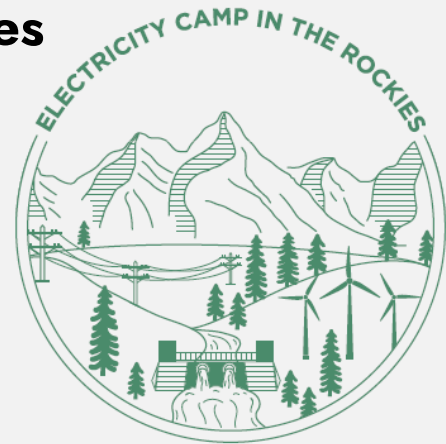

A workshop on electricity markets and policy

Banff, Alberta

May 24-26, 2023

Organized by the University of Calgary

With support from Alberta Innovates, Alberta Electric System Operator, Market Surveillance Administrator, Canadian Association for Energy Economics, and the Journal of Environmental Economics and Management

Aims and Scope

The objective of the workshop is to bring together academics, policy makers, and practitioners to discuss leading research and policy developments related to electricity markets. Scholars are a mix of **energy economists** and **energy systems modelers** to encourage transdisciplinary learning and foster new collaborations. The workshop is deliberately kept small to encourage more dialogue and relationship-building.

A link to last year's program can be found [here](#).

Prospective Participants

- Scholars are invited to submit abstracts by email to blake.shaffer@ucalgary.ca. Papers should be focused on electricity markets with a particular emphasis on policy. Deadline for submission is **March 1, 2023**.
- Practitioners and policy makers are invited to email blake.shaffer@ucalgary.ca to inquire about opportunities to attend the workshop. To encourage fulsome discussion and active engagement, the workshop size will be limited to 60.

Venue

The workshop will be held at the [Banff Centre](#), a [1.5 hour drive](#) from Calgary International Airport. The workshop will begin Wednesday afternoon and be completed by midday on Friday. Talks in the morning are complemented with outdoor activities in the afternoon (it's camp, after all!) and communal dinners are included in the program. An updated schedule will be shared with participants prior to the event.
